

Cybersecurity Incident Response Plan - SOC 2 Standard

Document Reference: SEC-POL-2024-V3 | Classification: Internal Confidential

1. Purpose & SOC 2 Compliance Framework:

This security manual defines the mandatory protocols for identifying, containing, and eradicating cybersecurity threats, phishing attempts, and data breach incidents.

2. Mandatory Incident Escalation & Response Protocols:

- Immediate Quarantine: Any compromised endpoint or server must be disconnected from the LAN.
- Breach Notification Window: Regulatory bodies and affected clients must be notified within 72 hours.
- Credential & Secret Rotation: All API tokens, SSH keys, and database passwords must be revoked.
- Multi-Factor Authentication: Hardware MFA (FIDO2 WebAuthn keys) is mandatory for all access.

3. Post-Incident Forensics & Audit Trail:

Security engineers must preserve memory dumps, firewall logs, and audit trails for compliance analysis.
